Ongoing Business Development

Whilst Company remains focused on advancing its existing portfolio of projects in Peru, the Company is also actively negotiating the acquisition of additional high-potential projects in Peru on a 100% basis, which would provide the Company with greater operational control and the flexibility of farming-out these projects at the appropriate time. Recent project-level transactions in both Peru and neighbouring Ecuador provide further evidence that high quality projects in the Northern Andean Copper Belt continue to deliver excellent transaction-based outcomes. Through the Strategic Project Generator model, the Company is positioning itself to be a beneficiary in this increased appetite for prospective projects in this region.
